## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 31-36 and 47-61, drawn to an integrated circuit package, classified in class 257, subclass 678.
- II. Claims 1-30, drawn to a method for hermetically sealing a package, classified in class 438, subclass 15+.
- III. Claims 37-46, drawn to a system for hermetically sealing an integrate circuit package, classified in class 361, subclass 679+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, instead of performing a photolithographic process, it can be performed by a sputtering process.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
